Racing Unleashed, based in the canton of Zug, has been combining the glamorous world of motorsport with the digital future of gaming for over a year now. With our high-quality racing simulators "Made in Maranello" we are building a new global and digital sport and let professionals and amateurs, sports fanatics, and casual gamers race for the fastest laps on the most famous racetracks in the world. To get Racing Unleashed, our competition, and franchising concept to the next level and to accompany this growth with an accurate IT system, we are looking for a committed, dynamic, and young at heart:

Chief Information Officer, CIO (100%), Member of the management, eventual Co-Entrepreneur

In our team, you are responsible for the development and implementation of a scalable software and IT platform in the field of esports, that supports a global network of franchisees, back-end users, and customers. You are responsible for ensuring the smooth operation of the IT infrastructure and its security, various systems (software and hardware), and databases for the Racing Unleashed Group. You are the link between management and the technical departments and can translate our great visions and needs into functioning IT concepts.

You will build a team that will work with you to ensure a globally available IT infrastructure, to ensure data protection and the continuous development of all our products and systems. Are you familiar with the common programming languages, with data science, do you know something about artificial intelligence and are you not put off by Big Data and the introduction of an ERP in a fast-growing company? Then you are exactly the right person for us!

YOUR MAIN TASKS INCLUDE

Software development and operation in the following areas:
- Internal IT
  - ERP systems
  - HR systems
  - Accounting systems

- Marketfacing systems
  - Lounge Member Management
  - Payment systems
  - Driver management
  - Fan management
  - Sponsor management
  - Racing management
  - Web portals
  - Mobile apps

- Simulation software
  - Connection and management of the simulation software
  - Controlling of simulators
  - Connection of Racing Lounges
  - Data management/telemetry data/AI

IN DETAIL THIS INCLUDES:

- Monitoring, supervision and controlling of activities, functionalities, and resources connected to the IT systems used in the company
- Creation and further development of an IT strategy and IT architecture
- Coordination between internal and external service providers
- Ensuring the successful implementation of IT projects in various areas

YOU HAVE IDEALLY

- A university degree in IT/Software or equivalent education, preferrably ETH, MIT or similar
- Several years' professional experience in the same or a similar function with experience in the following areas:
  - IT security and data protection
  - IT project management and project lead
  - Quality and risk management
- Experience with the following systems and platforms:
  - ERP systems including complex billing applications
  - Gaming platforms
  - Social Media / Member platforms

You can expect an exciting, varied, and responsible job in an environment that is developing rapidly. You will be part of a young but experienced and international team that works together at a high pace – simply Racing Unleashed.

If you have any questions about the position as CIO or the company itself, please contact Monisha Kaltenborn at jobs@racing-unleashed.com. We look forward to receiving your complete application documents at the above e-mail address.
